SUMMARY

Software Engineer with hands-on industry experience in enterprise and web application development. Started career with a hybrid internship and currently working full-time at Softech Solution. Experienced in legacy system modernization, H2H integrations, POS systems, and utility billing solutions. Strong knowledge of .NET technologies, SQL, file processing, and PDF bill generation. Passionate about writing clean, efficient, and maintainable code.

WORK EXPERIENCE

Software Engineer

Softech Solution

June 2025 – Present

- Working on H2H (Host-to-Host) systems, converting old legacy workflows into new optimized processes.
- Added new functionalities and enhancements to existing applications based on business requirements.
- Actively involved in POS (Point of Sale) application development and maintenance.
- Worked on Torrent Power billing project, implementing Text file to PDF bill conversion with accurate formatting and validations.
- Performed bug fixing, code refactoring, and performance optimization.
- Collaborated with team members for requirement analysis, testing, and deployment.

Software Engineer Intern (Hybrid)

Mamo Technolab

Dec 2024 – Mar 2025

- Completed a hybrid internship with exposure to real-time development tasks.
- Worked on full-stack web development using React.js, Node.js, and MongoDB.
- Implemented user authentication, API integration, and responsive UI components.
- Assisted in bug fixing, testing, and feature enhancements.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, JavaScript, SQL
- **Frameworks Technologies:** ASP.NET, WPF / WinForms, React.js, Node.js,
- **Databases:** SQL Server, MongoDB, MySQL
- **Tools:** Visual Studio, Git, Postman

PROJECTS

Old Book Selling Platform *Web Development Project*

ASP.NET MVC, C,
Bootstrap, Entity
Framework, SQL

- Developed a web platform for buying and selling second-hand books with Google authentication.
- Integrated WhatsApp for direct seller-buyer communication.
- GitHub: [🔗](#)

Doctor Appointment System *Web Development Project*

React, Tailwind CSS

- Developed a doctor appointment scheduling application allowing users to book and manage appointments.
- Designed an intuitive UI to view doctors and available time slots.
- GitHub: [🔗](#)

FarmFresh *MERN Stack Web Application*MongoDB, ExpressJS,
ReactJS, NodeJS,
JavaScript

- Developed a MERN stack application with JWT-based authentication and authorization.
- Implemented product creation, update, and deletion with a responsive user interface.
- Optimized backend APIs for performance and data security.
- GitHub: [🔗](#)

EDUCATION

B.Tech in Computer Science and Engineering *Parul University*

Aug 2021 – May 2025

CERTIFICATIONS

Data Analytics with Python

Score: 60/100

- Completed NPTEL's Data Analytics with Python course, gaining exposure to data manipulation, visualization, statistics, and machine learning using Python. Applied skills in real-world projects for practical experience in data analysis.

Node.js Workshop

- Participated in a hands-on Node.js workshop to deepen skills in server-side JavaScript and backend development.
